## HOW TO CARE FOR YOUR PRODUCTS FROM MASTIC HOME EXTERIORS BY PLY GEM.

Your selection of Mastic Home Exteriors by Ply Gem Siding and/or Aluminum products to cover your most valuable investment should provide a beautiful appearance and long-lasting protection. To keep your home beautiful over the years, you should implement the following procedures at least annually for the major care of your Mastic Home Exteriors by Ply Gem Siding and Aluminum Products:

- 1. General Cleaning.** Use an ordinary garden hose to give your siding a light rinse working from the top down.
- 2. Moderate Atmospheric Dirt.** We recommend at least an annual washing with clear water using a garden hose and soft-bristled brush. A long-handled car washing brush is ideal for this purpose.
- 3. Heavy Industrial Atmospheric Dirt.** Wash in the manner indicated above, but use the following solution:
  - 1/3 cup detergent (Tide®, for example)
  - 2/3 cup trisodium phosphate
  - 1 gallon water
- 4. Mildew Accumulation.** Mildew can collect on surfaces of all types of building products and is often evident on surfaces that have not been properly cared for and maintained. Normally, mildew will appear as black spots. Mildew can be removed by using the basic cleaning solution above with the addition of sodium hypochlorite as follows:
  - 1/3 cup detergent (Tide®, for example)
  - 2/3 cup trisodium phosphate
  - 1 quart sodium hypochlorite 5% solution (Clorox®, for example)
  - 3 quarts water
- 5. Additionally for Aluminum Products.** For caulking compounds, tar and similar substances use mineral spirits in reasonable amounts and apply directly to the foreign substance. Immediately after cleaning, rinse the area thoroughly with water.

instructions for the use of cleaning compounds and solutions. Avoid use of abrasive-type cleaners and strong solvents. Test any cleaner on an inconspicuous area before applying to major areas. To minimize streaking, always clean from the bottom to the top and follow with a rinsing of clear water. Excessive scrubbing is unnecessary, can be harmful to the products, and may cause undesirable glossy areas over the finish.

**CAUTION:** Do not use or mix sodium hypochlorite with other household chemicals or products containing ammonia. To do so will release hazardous gases.

**CAUTION:** Use care not to saturate window and door openings when cleaning your Mastic Home Exteriors by Ply Gem siding and aluminum products.

**TIP:** Where the house is extremely dirty, it is recommended you start washing from the bottom and go to the top, rinsing frequently. Cleaning solutions should be permitted to stand on the surface of the siding and/or soffit for several minutes before rinsing.

**TIP:** Pay particular attention to areas under eaves, porches, awnings, and other overhangs that have limited exposure to the natural washing effect of rainfall.

**CAUTION:** Do not exceed the recommended concentrations of cleaners; to do so can cause damage to the products' surface. Avoid skin and eye contact with the solution, and in all cases follow manufacturer's

## CARE AND MAINTENANCE

Mastic Home Exteriors by Ply Gem Premium Vinyl Siding, Soffit and Accessories are some of the most durable building products materials available today for residential applications. In most cases, normal rainfall is sufficient to keep it clean. But if your Mastic Home Exteriors by Ply Gem Vinyl Siding should need cleaning, we recommend the following procedures. Particular attention should be given to areas under eaves, porches, awnings and other overhangs that have limited exposure to the natural washing effect of rainfall.

- Moderate Atmospheric Dirt** — We recommend an occasional washing with clear water using a garden hose and soft-bristled brush (a long-handled, car-washing brush is ideal for this purpose).
- Heavy Industrial Atmospheric Dirt** — Wash in the manner indicated above, but use the following solution:
  - 1/3 cup detergent (Tide®, for example)
  - 2/3 cup trisodium phosphate (Soilax®, for example)
  - 1 gallon water
- Mildew Accumulation** — Mildew can collect on surfaces of all types of building products and is often evident on surfaces that have not been properly cared for and maintained. Normally, mildew will appear as black spots. Mildew is easy to remove by using the basic cleaning solution above with the addition of sodium hypochlorite as follows:
  - 1/3 cup detergent (Tide®, for example)
  - 2/3 cup trisodium phosphate (Soilax®, for example)
  - 1 quart sodium hypochlorite 5% solution (Clorox®, for example)
  - 3 quarts water

- Caulking Compounds, Tar and Similar Substances** — Use mineral spirits in reasonable amounts and apply directly to the foreign substance. Immediately after cleaning, rinse the area thoroughly with water.

**CAUTION:** Do not exceed the recommended concentrations of cleaners. To do so can cause damage to the Products' surface. Avoid skin and eye contact with the solution, and in all cases follow manufacturer's instructions for the use of cleaning compounds and solutions. Avoid use of abrasive-type cleaners and strong solvents. Test any cleaner on an inconspicuous area before applying to major areas. To minimize streaking, always clean from the bottom to the top and follow with a rinsing of clear water. Excessive scrubbing is unnecessary and can be harmful to the Products, and may cause undesirable glossy areas over the finish.

## IMPORTANT: FIRE SAFETY INFORMATION

Exterior vinyl building materials require little maintenance for many years. Nevertheless, common sense dictates that builders and suppliers of vinyl products store, handle and install vinyl materials in a manner that avoids damage to the product and/or structure. Owners and Installers should take a few simple steps to protect vinyl building materials from fire.

### TO THE HOME AND BUILDING OWNER

Rigid vinyl siding is made from organic material and will melt or burn when exposed to a significant source of flame or heat. Building owners, occupants and outside maintenance personnel should always take normal precautions to keep sources of fire, such as barbecues, and combustible materials, such as dry leaves, mulch and trash away from vinyl siding.

### TO THE BUILDING TRADES, SPECIFIERS, PROFESSIONAL AND DO-IT-YOURSELF INSTALLERS

When rigid vinyl siding is exposed to significant heat or flame, the vinyl will soften, sag, melt or burn, and may thereby expose material underneath. Care must be exercised when selecting underlayment materials because many underlayment materials are made from organic materials that are combustible. You should ascertain the fire properties of underlayment materials prior to installation. All building materials should be installed in accordance with local, state and federal building code and fire regulations.

For more information about vinyl siding products, contact the Vinyl Siding Institute, 1275 K St. NW, Washington DC 20005-4006 and request brochures titled, "Fire Properties" or "What Homeowners Want to Know", or contact Mastic Home Exteriors by Ply Gem and request brochure titled "Fire Safety, What You Need to Know".

## CARE AND MAINTENANCE

Mastic Cedar Discovery siding is one of the most durable building products materials available today for residential applications. In most cases, normal rainfall is sufficient to keep it clean. But if your Mastic Cedar Discovery Siding and Accessories should need cleaning, the following procedures are recommended. Particular attention should be given to areas under eaves, porches, awnings, and other overhangs that have limited exposure to the natural washing effect of rainfall.

- Moderate Atmospheric Dirt** — An occasional washing with clear water using a garden hose and soft-bristled brush is recommended (a long-handled, car-washing brush is ideal for this purpose).
- Heavy Industrial Atmospheric Dirt** — Wash in the manner indicated above, but use the following solution:
  - 1/3 cup detergent (Tide®, for example)
  - 2/3 cup trisodium phosphate (Soilax®, for example)
  - 1 gallon water
- Mildew Accumulation** — Mildew can collect on surfaces of all types of building products and is often evident on surfaces that have not been properly cared for and maintained. Normally, mildew will appear as black spots. Mildew is easy to remove by using the basic cleaning solution above with the addition of sodium hypochlorite as follows:
  - 1/3 cup detergent (Tide®, for example)
  - 2/3 cup trisodium phosphate (Soilax®, for example)
  - 1 quart sodium hypochlorite 5% solution (Clorox®, for example)
  - 3 quarts water

**CAUTION:** Do not exceed the recommended concentrations of cleaners. To do so can cause damage to the products' surface. Avoid skin and eye contact with the solution, and in all cases follow manufacturer's instructions for the use of cleaning compounds and solutions. Avoid use of abrasive-type cleaners and strong solvents. Test any cleaner on an inconspicuous area before applying to major areas. To minimize streaking, always clean from the bottom to the top and follow with a rinsing of clear water. Excessive scrubbing is unnecessary, can be harmful to the products, and may cause undesirable glossy areas over the finish.

## IMPORTANT: FIRE SAFETY INFORMATION

Exterior polymer building materials require little maintenance for many years. Nevertheless, common sense dictates that builders and suppliers of polymer products store, handle and install polymer materials in a manner that avoids damage to the product and/or structure. Owners and installers should take a few simple steps to protect polymer building materials from fire.

## TO THE HOME AND BUILDING OWNER

Rigid polypropylene siding is made from organic material and will melt or burn when exposed to a significant source of flame or heat. Building owners, occupants and outside maintenance personnel should always take normal precautions to keep sources of fire, such as barbecues, and combustible materials, such as dry leaves, mulch and trash away from rigid polypropylene siding.

## TO THE BUILDING TRADES, SPECIFIERS, PROFESSIONAL AND DO-IT-YOURSELF INSTALLERS

When rigid polypropylene siding is exposed to significant heat or flame, the rigid polypropylene will soften, sag, melt, or burn, and may thereby expose material underneath. Care must be exercised when selecting underlayment materials because many underlayment materials are made from organic materials that are combustible. You should ascertain the fire properties of underlayment materials prior to installation. All building materials should be installed in accordance with local, state and federal building code and fire regulations.

**FACTS ABOUT THE INSTALLATION OF ALUMINUM PRODUCTS**

We designed and manufactured Mastic Home Exteriors by Ply Gem Aluminum Siding, Aluminum Soffit, Aluminum Siding and Soffit Accessories, Aluminum Trim Coil, and Aluminum Fascia to perform best when installed by qualified applicators. While Mastic Home Exteriors does not assume responsibility for installation of its products, it does keep installers informed on new techniques and provides detailed installation instructions on all of its products. We frequently update our installation manuals with new and improved methods of application.

You should discuss any product adjustments with the dealer or applicator who did the work. These adjustments can best be made by the original dealer or applicator, since he or she is most familiar with your particular installation.

**CARE & MAINTENANCE**

Mastic Home Exterior by Ply Gem Envoy Sectional Rain Removal Systems is one of the most durable building products materials available today for residential applications. In most cases, normal rainfall is sufficient to keep it clean. But if your Mastic Home Exterior Envoy Sectional Rain Removal Systems should need cleaning, we recommend the following procedures. Particular attention should be given to areas that have limited exposure to the natural washing effect of rainfall.

- Moderate Atmospheric Dirt** — We recommend an occasional washing with clear water using a garden hose and soft-bristled brush (a long-handled, car-washing brush is ideal for this purpose).
- Heavy Industrial Atmospheric Dirt** — Wash in the manner indicated above, but use the following solution:
  - 1/3 cup detergent (Tide®, for example)
  - 2/3 cup trisodium phosphate (Soilax®, for example)
  - 1 gallon water
- Mildew Accumulation** — Mildew can collect on surfaces of all types of building products and is often evident on surfaces that have not been properly cared for and maintained. Normally, mildew will appear as black spots. Mildew is easy to remove by using the basic cleaning solution above with the addition of sodium hypochlorite as follows:
  - 1/3 cup detergent (Tide®, for example)
  - 2/3 cup trisodium phosphate (Soilax®, for example)
  - 1 quart sodium hypochlorite 5% solution (Clorox®, for example)
  - 3 quarts water
- Caulking Compounds, Tar and Similar Substances** — Use mineral spirits in reasonable amounts and apply directly to the foreign substance. Immediately after cleaning, rinse the area thoroughly with water.

**CAUTION:** Do not exceed the recommended concentrations of cleaners. To do so can cause damage to the Products' surface. Avoid skin and eye contact with the solution, and in all cases follow manufacturer's instructions for the use of cleaning compounds and solutions. Avoid use of abrasive-type cleaners and strong solvents. Test any cleaner on an inconspicuous area before applying to major areas. To minimize streaking, always clean from the bottom to the top and follow with a rinsing of clear water. Excessive scrubbing is unnecessary and can be harmful to the Products, and may cause undesirable glossy areas over the finish.

**FACTS ABOUT THE INSTALLATION OF MASTIC HOME EXTERIORS ENVOY SECTIONAL RAIN REMOVAL SYSTEMS**

We designed and manufactured Mastic Home Exterior by Ply Gem Envoy Sectional Rain Removal Systems to perform best when installed by qualified applicators. While Mastic Home Exterior does not assume responsibility for installation of its products, it does keep installers informed on new techniques and provides detailed installation instructions on all of its products. We frequently update our installation manuals with new and improved methods of application.

You should discuss any product adjustments with the dealer or applicator who did the work. These adjustments can best be made by the original dealer or applicator, since he or she is most familiar with your particular installation.

**NOTE:** Direct contact of aluminum products with certain dissimilar materials, or contact with water run-off from dissimilar materials, is likely to result in corrosion. Accordingly, care should be taken during installation to avoid contact of aluminum with dissimilar materials including dissimilar metals (e.g. copper, zinc, steel, etc.), concrete, stucco, asbestos siding, pressure treated/pretreated lumber, roofing materials or roofing systems containing metallic granules or strips, or corrosive non-metallic materials.

\*For detailed coverage of warranty information on Leaf Relief products, reference the brochure "Leaf Relief Warranty," available from your installing dealer.

Mastic Home Exterior by Ply Gem manufactures Gutter Coil and Related Accessories (the "Products"), in accordance with high standards and tight quality controls. The Products will not rust, burn or support combustion, or split or crack due to cold weather because they are made of aluminum.

**WHAT DOES THIS WARRANTY COVER?**

Mastic Home Exterior warrants to you, the owner of the property at the time the Products were installed, that the Products are free from defects in material and workmanship in the course of manufacture, and that the finish on the Products will not chip, peel, flake or blister under conditions of ordinary wear, if installed according to our specifications.

This Warranty is limited to the terms and conditions, exclusions and limitations, requirements and legal rights stated in this Warranty.

**HOW LONG DOES THE COVERAGE LAST?**

This Registered 20-Year Limited Warranty lasts for twenty (20) years on the property on which the Products were originally applied ("Property") so long as you own the Property. This Registered 20-Year Limited Warranty may be transferred one time with the Property. However, upon the transfer, the Warranty period will be no more than 20 years from the date of original installation of the Products on the Property, prorated in accordance with the Warranty Coverage Schedule below. In the event of a transfer of this Warranty, this Warranty may not be further transferred.

**WHAT WILL WE DO?**

You must notify us in accordance with the notice requirements outlined below, and we must validate the complaint. Upon the notification and validation, we will undertake the following:

We will repair, replace or refund the purchase and installation price of the defective portion of our siding that blisters, checks, crazes, flakes, peels or weathers unevenly due to a defect in our manufacturing process. Our obligations under this Warranty will in no event exceed the purchase price of the originally installed Products found to be defective. Any additional costs and expenses beyond these amounts are your responsibility.

In the event of repair, replacement or refinishing under this Warranty, the Warranty applicable to the replacement material or to the repaired or refinished Products will extend only for the time remaining under the original Warranty.

**WHAT DOESN'T THIS WARRANTY COVER?**

This Warranty does not cover:

- damage of any kind resulting from faulty or improper installation;
- **changes in surface color resulting from chalking, fading, soiling or staining. Exposure to the elements may cause these changes over time; the degree to which weathering occurs will vary depending on air quality, the building's location and other local conditions over which we have no control;**
- paint removal during forming due to improper (unconditional, uncovered) outside storage prior to installation;
- accidental damage;
- settlement;
- structural shrinkage or distortion of the property structure;
